13. The ambient temperature allowed is -20 °C to +60 °C.
14. The AR-023 Timer relay is a multi-functional time relay that can be used to switch apparatus on or off. Seven different programs can be used to switch after or for a pre-set time period, repeat an input signal or to process the input signal (shorten or lengthen the signal). The AR-023 can be set at time interval set points varying from 1 second to 160 minutes.

The AR-023 Timer relay consists of an aluminium housing with internal or external start button that is connected to an intrinsically safe circuit. After pushing the button the relay is switched depending on the selected program function and the output terminals are powered during a pre-set time period. Furthermore, there is a terminal present for looping through the mains. The housing is provided with Ex e cable glands.

15. **Specific conditions for use**

The DIN rail version of the AR-023 must be installed in an Ex ec / tc certified housing
